

THE DEMON NAMED SET (SETH)

Many people do not know that in some movies, the actors actually have sex. They may be pretending to be acting when they are craving each other in reality. Some movie actors leave their real spouses to have a relationship with the one they acted in a movie with. Their real lives “end” for them to take in their unrealistic reality, a make-believe hope of the “grass is greener on the other side” type of view.

The point of saying this is that you never know if the actors are actually engaging in sexual actions when pretending to be in a relationship in a sex scene. You have to wonder or process the notion that this could be. But what if it actually is? Is this a different level of selling yourself, one in which we are all guilty of participating in by entertaining it in our viewing? Some of us have gone on dates and had sex, so there is no judgment here.

It comes down to perception. I honor the man who doesn't touch any strange woman when he takes a photo with her. I respect the actor who chooses not to kiss their screen “fake” spouse to make a movie director happy. But that allowance of letting sex on film lead doesn't change the action, nor does getting paid a significant sum make it a more honorable task.

And now, with today's technology, a person cannot tell what reality is versus what is fake. They put a person's face on another person's body, and no one knows if it's real or fake. Now with photo filters, the cases of mental abnormalities are booming, for most want to cover a natural flaw. The facelifts, the hair dyes, and the wanting to be someone else in presentation take a footing within one's self-esteem, trying to outdo the other to want the way of what looks successful. I have done photo filters to hide my dark circles from working many hours, yet continual use would hinder me from loving my appearance.

War and chaos are raging in our nations. But what can be said about how the demon Set (Seth) invades? The Egyptian lowercase god Set is viewed by many as a lowercase god of war and chaos. This demon, shown throughout history in various facets, is presented

in movies as a demon influence to look up to, in character used to kill a mate during a sexual engagement. And in movies, honoring Egyptian lowercase gods brings the one who watches to a place of yielding, opening to whatever action or nature stems from that demon.

A character pretending to have sex with a character pretending to be the demon named Set sets up a stage for chaos in those who view it as entertainment. The entering of demons is not far behind when watching movies that bring honor to any lowercase god through the **conjuring** of that demon the action is based in.
